

# CONTENTS

## **Acknowledgments ix**

### **Introduction**

The Shale Dilemma

*SHANTI GAMPER-RABINDRAN* **3**

## **PART I: THE UNITED STATES**

### **1. Mixed Fortunes**

The Risks and Rewards of Developing Shale Gas

*SHANTI GAMPER-RABINDRAN* **33**

### **2. Should Benefits and Costs Be Spread More Evenly?**

Political Battles over Local Government Powers, Taxation, Regulation,  
and Disclosure

*SHANTI GAMPER-RABINDRAN* **89**

## **PART II: EUROPE**

### **3. The United Kingdom**

To Develop or Not to Develop? One Nation or Localization?

*JIM SKEA* **137**

### **4. Poland**

Disappointed Expectations: Energy Security vs. Bureaucracy and Geology

*MICHAEL LABELLE* **178**

### **5. France**

The Power of Public Opposition: From Permits to Protests to Bans

*PATRICE GEOFFRON* **204**

### **6. Germany**

The German *Energiewende* and the Decision to Ban Unconventional  
Hydraulic Fracturing

*MIRANDA A. SCHREURS* **231**

**PART III: EMERGING ECONOMIES****7. China**

Replacing Coal with Shale Gas: Could Reducing China's Regional  
Air Pollution Lead to More Local Pollution in Rural China?

*ALVIN LIN*     **267**

**8. Argentina**

Energy Extraction and Communities: Can Shale Development Proceed  
without Causing Pollution and Conflicts?

*MARÍA FLORENCIA SAULINO*     **305**

**9. South Africa**

Trying Not to Repeat History: Are Shale Gas Development and  
Broad-Based Economic Development Compatible?

*BARRY MORKEL AND MAARTEN DE WIT*     **342**

**Conclusion**

How and Why Countries Decide on Shale, and How They Can  
Make Better Decisions

*SHANTI GAMPER-RABINDRAN*     **379**
